

# **Expert Indicator Reviewers and Affiliations**

## **June 12-13, 2002**

A panel of 18 experts in various disciplines from inside and outside EPA provided input on the documentation of the 166 potential indicators suggested at the six workshops held between Jan-Feb '02. Special attention was directed to data quality and coverage; suitability of indicator; alignment of the indicator to the question being asked; additional or alternative indicator(s) for the questions asked, and query for other questions and associated indicators to better address the issues.

### **Ecological Condition**
